Technical Skills

Frontend: HTML5, CSS, JQuery, Javascript, Bootstrap, AJAX, SASS

Backend: MySQL, MongoDB, Express, ReactJS, Node, Handlebars, Firebase, AWS, Webpack, Gulp

Projects

Cinema & Sip | [Repo](#) | [Deployed](#)

Scrum Master/Project Manager

- Quickly provides an end user with a unique customized movie and beverage suggestion.
- Through the use of two web side APIs, which are consistently updated with new additions, user generated results are unique and relevant. Once the user has chosen a genre and beverage type, they are then presented with a unique selection, as well as drink ingredients.
- Tools/Languages: JavaScript, jQuery, Bulma CSS, TMDB/TheCocktailDB APIs

Day Planner | [Repo](#) | [Deployed](#)

Developer

- Allows users to input and save events to timeblocks, which are still available if the browser is closed.
- The interface includes color coded past, present, and future time blocks, which are actively updated using MomentJS. When the user inputs an event into a timeblock, then presses save, the event is saved to localStorage and will remain available whenever the site is loaded again.
- Tools/Languages: JavaScript, jQuery, Bootstrap, MomentJS, Notify.js, CSS

Weather Dashboard | [Repo](#) | [Deployed](#)

Developer

- Users can search a city by keyword, then they are present with current weather and a five day forecast.
- Using the OpenWeatherMap API, user queries are used to return the cities temperature, wind speed, humidity, and UV index. The UV index changes color according to the safety of the outdoor conditions, and each forecast is accompanied by an icon of the weather conditions.
- Tools/Languages: JavaScript, jQuery, Bootstrap, OpenWeatherMap API, CSS

Work Experience

Innovative Practical Solutions

May 2020 - Present

Frontend Web Developer

Laguna Niguel, CA

- Leading a team of employees and consultants to maximize efficiency and ensure that the deliverable meets all project requirements in a timely manner.
- Actively create, upkeep, and generate employee accounts, keys, and emails.
- Refactoring internal and customer code to meet modern functionality, performance, and accessibility standards.
